On Science

▶ Science is **cool!** [Sagan, 1980]

▶ Unfortunately **a big great many lot** of people do not seem to get it…[Feynman, 1974]

▶ And now some **math:**

Theorem (Euler's identity)

$$e^{i\pi} + 1 = 0 \tag{1}$$

Verbathings

- Not verbatim text, vs. `verbatim text`
- The `verbatim` ***environment*** also works:

  ```
  Lorem ipsum dolor sit amet, blah blah...
  ```

- The first main message of your talk in one or two lines.
- The second main message of your talk in one or two lines.
- Perhaps a third message, but not more than that.

References & Notes

Richard Feynman. *Cargo Cult Science*, 1974. `http://calteches.library.caltech.edu/51/2/CargoCult.htm` (last accessed: December 2018).

Carl Sagan. *Cosmos*. Random House, 1980.

But beware: `beamer` does not always play nice with references![1]

Besides, in a presentation the number of references should be minimised anyway…
